/ WORK EXPERIENCE

>> At **NFQ**, working with **Emma - The Sleep Company client**

Shopify Developer | 2021 to present

I currently working for Emma, a leading mattress company, where I specialize in developing Shopify themes that are user-friendly and easily customizable. I focus on creating visually appealing and responsive designs for an optimal user experience.

Contributions at Emma:

- Developing custom Shopify themes
- Implementing responsive design principles to ensure a seamless user experience across devices.

Key Skills:

- Proficient in HTML, CSS, JavaScript, Liquid, and jQuery.
- Experience with responsive web design and mobile-first development.
- Problem-solving and debugging skills.
- Collaboration and communication within cross-functional teams.

>> **NFQ**, working with **iPrice Group client**

Intern turned Software Developer | 2020 to 2021

Led the development and integration of a scalable price-scraping module at iPrice, overcoming challenges with dynamic website structures and anti-scraping mechanisms. Enhanced the platform's real-time price comparison capabilities, optimizing efficiency and improving user experience.

Technologies Used:

- Python (scripting and automation)
- Web scraping libraries (Scrapy)
- Data validation and parsing techniques
- HTML, CSS, Regex

>> **dwarves.foundation**

Intern turned iOS Developer | 2019 to 2020

Started my journey at NFQ as a Golang intern and eventually shifted gears to become an iOS Developer. Together, we crafted Sol, a travel app aimed at making trip planning a breeze.

Here's what I did:

- Got my feet wet with Golang during my internship.
- Transitioned into iOS development, where I focused on refining Sol.
- Used Swift and RxSwift to create a smooth user experience.

Technologies Used:

- Swift (iOS development)
- RxSwift (Reactive programming for iOS)

Overall, it was a journey of learning and growth. Check out our travel app, Sol, and how I helped make it slick in this [Medium post!](#)"

/ EDUCATION

>> HUTECH - University of Technology

BS Web Development | Currently enrolled

/ COMPETENCIES

Programming Languages and Technologies:

- HTML
- CSS, SASS, Tailwind, Bootstrap
- ReactJS, jQuery
